

“Driven by charge, charged by nature”

Pollution from vehicles and climate changes have endangered life on planet challenging the sustenance and survival on planet earth. Erratic rainfall, droughts and forest fires demand immediate action to curb global warming and the forthcoming dangers.

Prevailing environment conditions require zero emission vehicles which have paved the way for EVs, eliminating the repercussions of fuel driven vehicles. This results in reduced smoke, CO, CO2 and better air quality index eliminating imminent dangers for our planet.

ARAI Academy is conducting One-day Electric Vehicle Awareness Programmes at Institutes/Universities in India. The Awareness Programme will be preceded by essay/drawing competition on “Electric Vehicles and its Benefits for the Society”.

3000 words max.
Essay Competition

A1 size
Poster Competition

Programme at a glance:

- Learn about the trending technologies in Electric Vehicles and our contribution for their faster adoption.
